

Physics, Martinus Cosmology and The Theory of Everything

Physicists have worked intensively for a long time to understand our physical world. They have also been struggling to unify the four forces of nature: gravity, electromagnetism and the strong and weak nuclear forces into a 'Theory of Everything', but so far without success. In this book Leif Pettersson presents a groundbreaking and very exciting material with theories based on the intuitive knowledge contained in Martinus Cosmology. These theories demonstrate a new model, 'The Fundamental Energy Theory – FET', that without any contradiction unifies the four fundamental forces of nature, and in fact gives us 'The Theory of Everything'! Hypotheses are presented that may explain the mechanisms behind Einstein's General and Special Theories of Relativity, quantum physics with its hypothetical gravitons, Higgs particles etc. and the enigmatic dark matter, dark energy and a lot more. The Fundamental Energy Theory offers a logical, coherent key to many of the unsolved mysteries of physics, e.g. those being currently studied in the world's biggest research project so far, the particle accelerator in CERN.

Leif Pettersson has succeeded in presenting this complex, astounding material in a clear-cut, rational and comprehensive way. With this book we are facing a completely new concept of reality!
